

FIRST HEART SCAN *free*

FACT:

**Heart disease
is the #1 killer
in America**

You can stop and even reverse heart disease. Take the first step toward peace of mind with a free heart scan.

Heart scans are doctor-recommended for all men over 45 and women over 50. Your first scan will establish a baseline and give you an accurate measure of your heart health.

You don't have to live in fear. We help you measure it so you can change it.

1 in 3

Americans die prematurely from heart disease

Stress tests

miss most people at risk

Most heart attacks

occur in people with "normal" cholesterol

7x

more women die from heart disease than breast cancer

At Cruxpoint, we share proven solutions to help you lower your heart attack risk by up to 95%.

By comparison, traditional statin drug treatment lowers your risk by only 0-25%.

FIRST HEART SCAN *free*

NO COST TO YOU • NO COMMITMENT • \$395 VALUE • THE ONLY EBT SCANNER IN COLORADO

Register online at
cruxpoint.com/free-heart-scan

We'll call to schedule your
free, quick EBT scan

After your scan, we'll make an
appointment to give you your
results & heart health outlook

Make a plan and discover
peace of mind!

No matter what your coronary calcium score, at Cruxpoint, it's all good news: You found it, and we have the proven solutions to reduce your risk, without difficult lifestyle changes.

note:

If you're in a committed relationship, we ask that both you and your eligible partner participate in getting a free scan and attending both the pre- and post-scan consultations.

Peace of mind is...

Finding your heart
disease before it
finds you.

An EBT score is the most reliable indicator of heart disease.

The EBT scanner is considered the “gold standard” of coronary calcium imaging and the most definitive assessment of heart disease risk. Most other scans expose you to more radiation and are less accurate.

Simply lie down, fully clothed, hold your breath for a few seconds, and the scanner will take pictures between heart beats. That's it! We'll have results back to you within 3 days.

At Cruxpoint, our mission is to halt and reverse heart disease for millions of Americans. Our innovative treatment protocols are built on the most current research, best practices, and clinical data accumulated over 20 years.

We partner with employers to reach America's workforce to halt the progression of this deadly disease.
